YOUR TRAINER

About the Trainer

Dr. Alfred Ang

Principal Trainer
Tertiary Infotech Academy Pte Ltd

ROLE

Principal Trainer, Tertiary Infotech Academy Pte. Ltd.

QUALIFICATIONS

PhD - specialises in AI, automation and software engineering.

DELIVERS

WSQ courses on cloud, AI agents, automation and app development.

FOUNDER

Founder and lead instructor at Tertiary Infotech / Tertiary Courses.

(c) 2026 Tertiary Infotech Academy Pte Ltd

ADMIN

Course Agenda

Day 1: cloud concepts, AWS account setup, IAM, security, compute, storage and databases.

Day 2: networking, monitoring, pricing, billing, support, architecture, migration, sustainability and exam review.

Eight hands-on labs mirror the Learner Guide and Lesson Plan.

(c) 2026 Tertiary Infotech Academy Pte Ltd

HOUSEKEEPING

Ground Rules

1. Set your mobile phone to silent mode.
2. Participate actively - no question is too small.
3. Mutual respect: agree to disagree.
4. One conversation at a time.
5. Be punctual; return from breaks on time.
6. 75% attendance is required.

(c) 2026 Tertiary Infotech Academy Pte Ltd

ADMIN

Course Objectives

Explain core AWS Cloud concepts and global infrastructure.

Describe IAM, shared responsibility and foundational security services.

Compare compute, storage, database, networking, monitoring and billing services.

Use AWS pricing, budget and support tools at a foundational level.

Prepare for AWS Certified Cloud Practitioner exam-style questions.

(c) 2026 Tertiary Infotech Academy Pte Ltd

ADMIN

Digital Attendance

Scan SSG / TRAQOM digital attendance when prompted.

AM, PM and assessment attendance are mandatory for WSQ-funded courses.

Minimum 75% attendance is required for assessment and funding.

Tell the trainer immediately if your attendance submission fails.

(c) 2026 Tertiary Infotech Academy Pte Ltd

ADMIN

LMS and Assessment Reminders

Courseware and assessment are accessed from the LMS.

Final assessment is conducted on Day 2.

Keep your lab notes, screenshots and service comparison tables ready.

Complete the TRAQOM survey before leaving class.

(c) 2026 Tertiary Infotech Academy Pte Ltd

LMS

Download Course Material

Open the LMS/TMS portal and sign in with your class account.

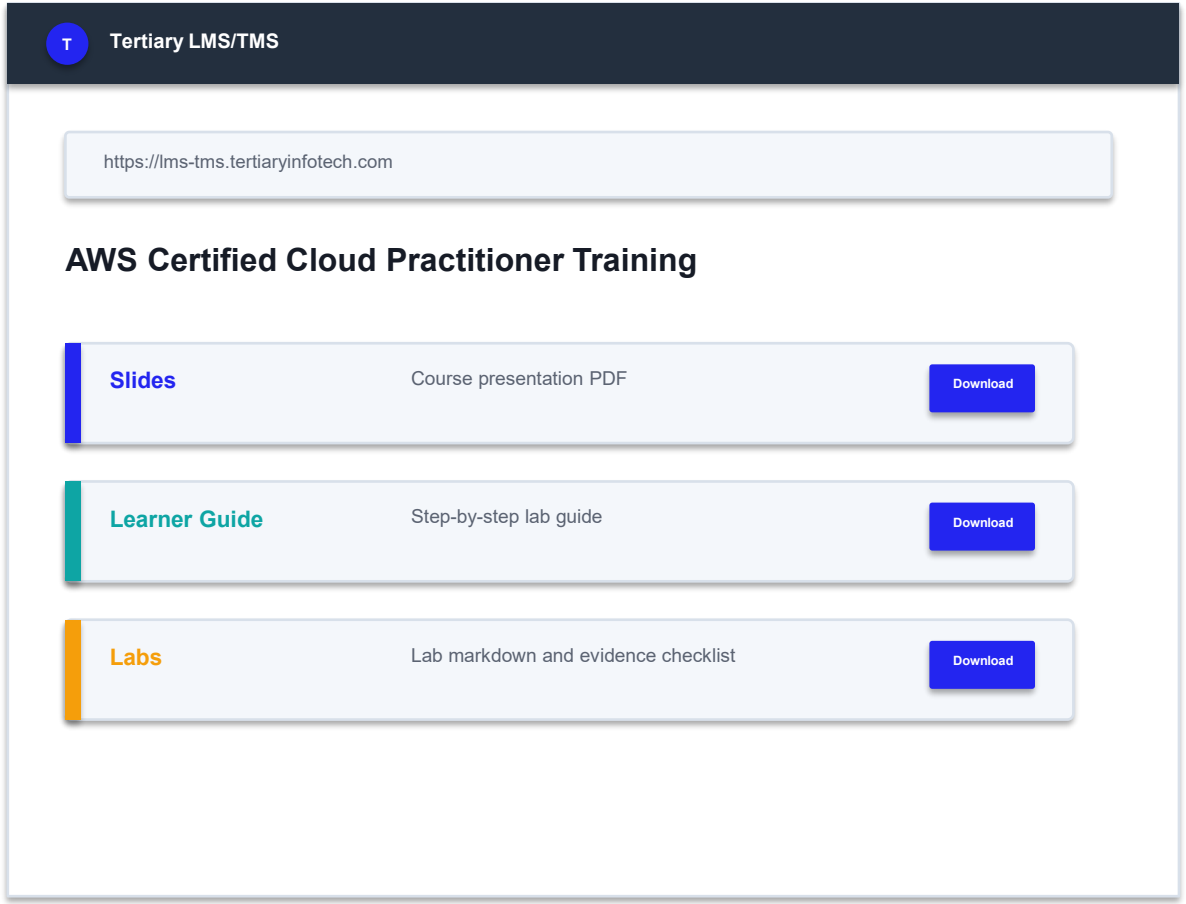

Select this AWS Certified Cloud Practitioner course.

Open Learner Guide, slides and lab files from Course Material.

Download the files before starting the hands-on labs.

Portal:

https://lms-tms.tertiaryinfotech.com

(c) 2026 Tertiary Infotech Academy Pte Ltd

ASSESSMENT

Assessment Flow Reminder

Complete WA and PP on the LMS/TMS portal, then sign the assessment summary record.

(c) 2026 Tertiary Infotech Academy Pte Ltd

ADMIN

Readiness Check

You can sign in to the assigned AWS account.

MFA and budget safety instructions are understood.

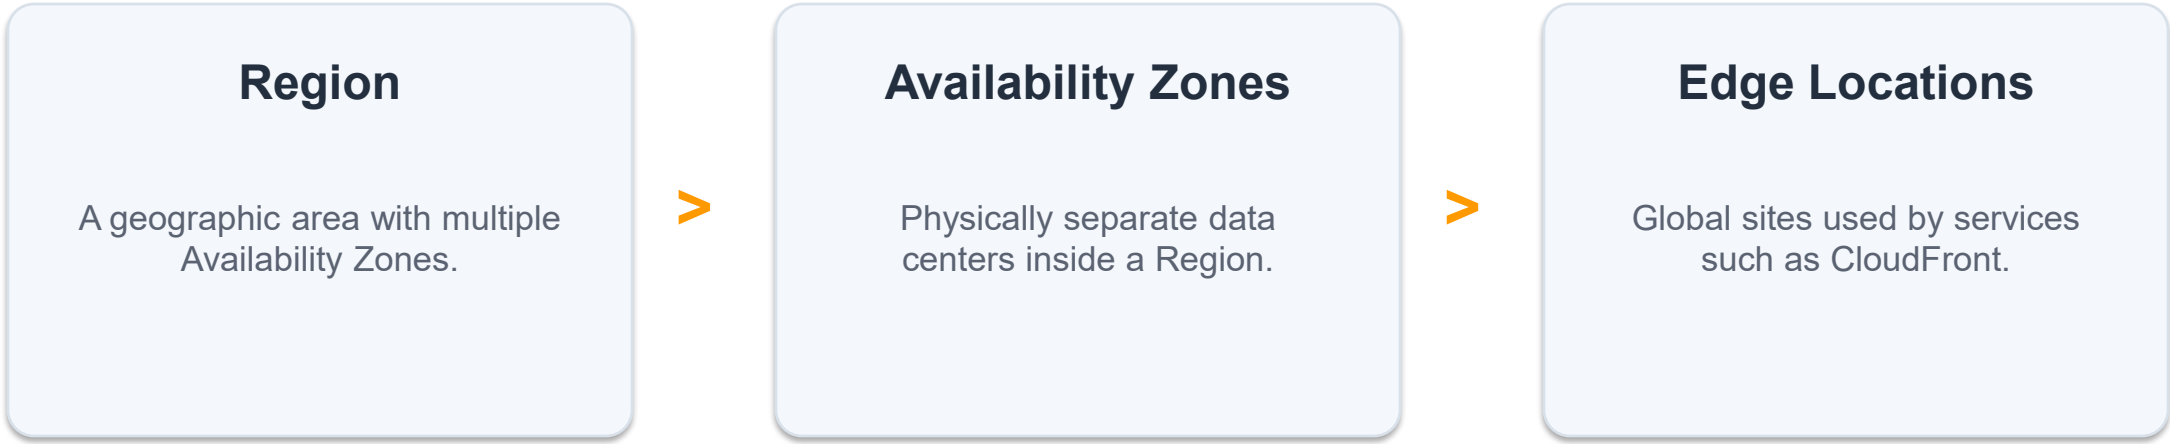

A working folder is ready for lab notes and screenshots.

You know how to ask for help before creating chargeable resources.

(c) 2026 Tertiary Infotech Academy Pte Ltd

CONCEPT DIAGRAM

AWS Global Infrastructure

(c) 2026 Tertiary Infotech Academy Pte Ltd

SECURITY

Shared Responsibility Model

AWS is responsible for

Physical facilities

Hardware and global infrastructure

Managed service platform security

Availability of AWS services

Customer is responsible for

Identity and access configuration

Data classification and protection

Application security

Resource cleanup and cost control

(c) 2026 Tertiary Infotech Academy Pte Ltd

Cloud Value Proposition

Trade capital expense for variable expense.

Benefit from massive economies of scale.

Stop guessing capacity.

Increase speed and agility.

Go global in minutes.

(c) 2026 Tertiary Infotech Academy Pte Ltd

AWS Service Selection Map

Compute: EC2, Lambda, ECS, EKS, Elastic Beanstalk.

Storage: S3, EBS, EFS, FSx, AWS Backup.

Database and analytics: RDS, Aurora, DynamoDB, Redshift, Athena, Glue, QuickSight.

Networking: VPC, ELB, CloudFront, Route 53.

Operations: CloudWatch, CloudTrail, Billing, Budgets, Support.

(c) 2026 Tertiary Infotech Academy Pte Ltd

LAB BRIEF

Lab 1: AWS Account Setup, Console Tour, and Cloud Concepts

You are new to AWS and need a secure starting point. This lab builds the foundation for all later service, billi...

Checkpoint: You should be able to explain the difference between regions, availability zones, edge locations, an...

(c) 2026 Tertiary Infotech Academy Pte Ltd

LAB

Lab 1 Objectives

Sign in to AWS safely.

Navigate the AWS Management Console.

Identify regions, availability zones, and edge locations.

Review cloud concepts and shared responsibility at a high level.

(c) 2026 Tertiary Infotech Academy Pte Ltd

STEP-BY-STEP

Lab 1 Procedure

Sign in to the AWS account assigned by your trainer.

Confirm that you are using the correct account.

Open the region selector.

Identify the current AWS Region.

Switch to another region and observe that some dashboards change by region.

Return to the region assigned by your trainer.

Open the EC2 console and find the Availability Zones page or subnet-related views.

Record the difference between a Region and an Availability Zone.

(c) 2026 Tertiary Infotech Academy Pte Ltd

STEP-BY-STEP

Lab 1 Procedure (continued)

Search for CloudFront and note that it uses a global service model.

Open the AWS Global Infrastructure page from AWS documentation if your trainer asks.

Open the AWS Well-Architected Tool or documentation.

Record the six Well-Architected pillars.

Review the shared responsibility model at a high level.

Create a short table with examples of AWS responsibilities and customer responsibilities.

Open the AWS Certification page and review the exam overview.

Record the exam duration, format, and foundational level.

Save your notes.

(c) 2026 Tertiary Infotech Academy Pte Ltd

EVIDENCE

Lab 1 Deliverables

Region and Availability Zone notes

Shared responsibility example table

Well-Architected pillar list

Exam overview notes

Validation: You should be able to explain the difference between regions, availability zones, edge locations, an...

(c) 2026 Tertiary Infotech Academy Pte Ltd

LAB BRIEF

Lab 2: IAM, Security, and Shared Responsibility

Cloud security starts with identity and access control. You will review core IAM concepts and connect them to th...

Checkpoint: You should be able to explain how IAM supports secure access and why the root user should not be use...

(c) 2026 Tertiary Infotech Academy Pte Ltd

LAB

Lab 2 Objectives

Understand IAM users, groups, roles, and policies.

Enable or verify MFA.

Review least privilege.

Locate CloudTrail and security-related services.

(c) 2026 Tertiary Infotech Academy Pte Ltd

STEP-BY-STEP

Lab 2 Procedure

Sign in to the AWS Management Console.

Open IAM.

Review the Account Security recommendations.

Verify that MFA is enabled for the root user or assigned administrator user if permitted.

Open Users and identify the difference between a user and the root account.

Open User groups and review how groups simplify permission management.

Open Policies.

View an AWS managed policy such as `ReadOnlyAccess`.

(c) 2026 Tertiary Infotech Academy Pte Ltd

STEP-BY-STEP

Lab 2 Procedure (continued)

Review the JSON structure of a policy.

Identify actions, resources, and effect.

Open Roles.

Review how roles are used by AWS services or external identities.

Create a short comparison table: user, group, role, policy.

Open CloudTrail.

Review Event history.

Find one recent console event.

Open Security Hub, GuardDuty, or Inspector pages if your trainer wants service awareness only.

Record which services help with detection, audit, and posture management.

Save your notes.

(c) 2026 Tertiary Infotech Academy Pte Ltd

EVIDENCE

Lab 2 Deliverables

IAM concept comparison table

Least-privilege policy notes

CloudTrail event screenshot or notes

Security service awareness notes

Validation: You should be able to explain how IAM supports secure access and why the root user should not be use...

(c) 2026 Tertiary Infotech Academy Pte Ltd

LAB BRIEF

Lab 3: Compute Services: EC2, Lambda, Containers, and Elasticity

AWS offers multiple compute choices. You will compare them from a Cloud Practitioner perspective and learn when...

Checkpoint: You should be able to match EC2, Lambda, and container services to basic workload scenarios.

(c) 2026 Tertiary Infotech Academy Pte Ltd

LAB

Lab 3 Objectives

Compare AWS compute services.

Understand EC2, Lambda, containers, and Auto Scaling.

Optionally launch and terminate a Free Tier eligible EC2 instance.

Match compute services to common use cases.

(c) 2026 Tertiary Infotech Academy Pte Ltd

STEP-BY-STEP

Lab 3 Procedure

Open the EC2 console.

Review the EC2 Dashboard.

Open Instance Types and observe that instances vary by CPU, memory, storage, and networking.

Open AMIs and review the idea of a machine image.

If your trainer permits hands-on creation, launch a Free Tier eligible instance.

Select an Amazon Linux AMI.

Select a Free Tier eligible instance type.

Use a temporary key pair or trainer-approved access method.

(c) 2026 Tertiary Infotech Academy Pte Ltd

STEP-BY-STEP

Lab 3 Procedure (continued)

Configure a security group with minimal access.

Launch the instance.

Review instance state, public IP, and monitoring tab.

Terminate the instance before leaving the lab.

Open AWS Lambda.

Review function concepts such as runtime, trigger, and execution role.

Create a simple function only if your trainer permits it.

Open ECS and EKS pages for service awareness.

Open Auto Scaling or EC2 Auto Scaling Groups and review elasticity concepts.

Create a table comparing EC2, Lambda, ECS, EKS, and Elastic Beanstalk.

Save your notes.

(c) 2026 Tertiary Infotech Academy Pte Ltd

EVIDENCE

Lab 3 Deliverables

Compute service comparison table

Optional EC2 screenshot before termination

Lambda and container service notes

Elasticity notes

Validation: You should be able to match EC2, Lambda, and container services to basic workload scenarios.

(c) 2026 Tertiary Infotech Academy Pte Ltd

LAB BRIEF

Lab 4: Storage Services: S3, EBS, EFS, Backup, and Lifecycle

Storage choice affects cost, availability, performance, and durability. You will compare AWS storage services an...

Checkpoint: You should be able to explain when to use S3, EBS, EFS, FSx, and AWS Backup.

(c) 2026 Tertiary Infotech Academy Pte Ltd

LAB

Lab 4 Objectives

Understand object, block, and file storage.

Create and secure an S3 bucket if permitted.

Review storage classes, versioning, and lifecycle rules.

Compare S3, EBS, EFS, FSx, and AWS Backup.

(c) 2026 Tertiary Infotech Academy Pte Ltd

STEP-BY-STEP

Lab 4 Procedure

Open the S3 console.

Create a bucket only if your trainer permits it.

Use a globally unique bucket name.

Keep Block Public Access enabled.

Upload a small sample file.

Review object properties.

Enable versioning if assigned.

Upload a changed version of the same file.

(c) 2026 Tertiary Infotech Academy Pte Ltd

STEP-BY-STEP

Lab 4 Procedure (continued)

Review object versions.

Open Lifecycle configuration.

Create a sample lifecycle rule only if instructed.

Review S3 storage classes such as Standard, Intelligent-Tiering, Standard-IA, Glacier Instant Retrieval, and Gla...

Open EC2 Volumes and review EBS as block storage.

Open EFS and review managed file storage.

Open FSx service page for awareness.

Open AWS Backup and review centralized backup concepts.

Create a table comparing object, block, and file storage.

Delete uploaded objects and the bucket if one was created.

Save your notes.

(c) 2026 Tertiary Infotech Academy Pte Ltd

EVIDENCE

Lab 4 Deliverables

Storage comparison table

S3 bucket screenshot or notes

Lifecycle and storage class notes

Cleanup confirmation

Validation: You should be able to explain when to use S3, EBS, EFS, FSx, and AWS Backup.

(c) 2026 Tertiary Infotech Academy Pte Ltd

LAB BRIEF

Lab 5: Databases and Analytics: RDS, DynamoDB, Redshift, and Athena

Cloud Practitioner candidates should know which AWS data service fits which workload. This lab focuses on servic...

Checkpoint: You should be able to choose between RDS, Aurora, DynamoDB, Redshift, Athena, Glue, and QuickSight f...

(c) 2026 Tertiary Infotech Academy Pte Ltd

LAB

Lab 5 Objectives

Compare AWS database services.

Understand managed relational, NoSQL, warehouse, and analytics services.

Review backup, scaling, and availability concepts.

Match services to business scenarios.

(c) 2026 Tertiary Infotech Academy Pte Ltd

STEP-BY-STEP

Lab 5 Procedure

Open Amazon RDS.

Review database engine options.

Note Multi-AZ, read replica, backup, and patching concepts.

Open Amazon Aurora and record how it relates to RDS.

Open DynamoDB.

Review table, item, partition key, and capacity concepts.

Open ElastiCache and note caching use cases.

Open Redshift and identify data warehouse use cases.

(c) 2026 Tertiary Infotech Academy Pte Ltd

STEP-BY-STEP

Lab 5 Procedure (continued)

Open Athena and note serverless querying on data in S3.

Open Glue and note data catalog and ETL awareness.

Open QuickSight if available and record BI dashboard use cases.

Create a service selection table for OLTP, NoSQL key-value, cache, data warehouse, ad hoc query, ETL, and BI.

Identify which services are serverless or managed.

Identify which services support backup or high availability features.

Save your notes.

(c) 2026 Tertiary Infotech Academy Pte Ltd

EVIDENCE

Lab 5 Deliverables

Database and analytics service selection table

Managed service notes

Backup and availability notes

Validation: You should be able to choose between RDS, Aurora, DynamoDB, Redshift, Athena, Glue, and QuickSight f...

(c) 2026 Tertiary Infotech Academy Pte Ltd

LAB BRIEF

Lab 6: Networking and Content Delivery: VPC, Security Groups, CloudFront, and Route 53

Networking connects AWS services securely. This lab builds foundational knowledge of VPC and content delivery co...

Checkpoint: You should be able to explain VPC basics, security groups, load balancing, DNS, and CDN use cases.

(c) 2026 Tertiary Infotech Academy Pte Ltd

LAB

Lab 6 Objectives

Understand VPC fundamentals.

Review subnets, route tables, internet gateways, and NAT gateways.

Compare security groups and network ACLs.

Understand CloudFront and Route 53 at a high level.

(c) 2026 Tertiary Infotech Academy Pte Ltd

STEP-BY-STEP

Lab 6 Procedure

Open the VPC console.

Review the default VPC if available.

Open Subnets and identify availability zone placement.

Open Route Tables and review route destinations and targets.

Open Internet Gateways.

Open NAT Gateways and record the use case.

Open Security Groups.

Review inbound and outbound rules.

(c) 2026 Tertiary Infotech Academy Pte Ltd

STEP-BY-STEP

Lab 6 Procedure (continued)

Compare security groups with network ACLs.

Draw a simple VPC diagram with public and private subnets.

Open CloudFront.

Review distribution, origin, cache behavior, and edge location concepts.

Open Route 53.

Review hosted zones, DNS records, and domain registration awareness.

Open Elastic Load Balancing and record load balancer use cases.

Create a networking service comparison table.

Save your notes.

(c) 2026 Tertiary Infotech Academy Pte Ltd

EVIDENCE

Lab 6 Deliverables

Simple VPC diagram

Security group vs network ACL notes

CloudFront and Route 53 concept notes

Networking comparison table

Validation: You should be able to explain VPC basics, security groups, load balancing, DNS, and CDN use cases.

(c) 2026 Tertiary Infotech Academy Pte Ltd

LAB BRIEF

Lab 7: Monitoring, Pricing, Billing, Budgets, and Support

Cloud literacy includes cost awareness and operational visibility. You will use monitoring, billing, and support...

Checkpoint: You should be able to explain which AWS tools help monitor resources, estimate costs, control spendi...

(c) 2026 Tertiary Infotech Academy Pte Ltd

LAB

Lab 7 Objectives

Review monitoring and audit services.

Create a budget alert if permitted.

Use AWS Pricing Calculator.

Compare AWS support plans and cost tools.

(c) 2026 Tertiary Infotech Academy Pte Ltd

STEP-BY-STEP

Lab 7 Procedure

Open CloudWatch.

Review metrics, alarms, logs, and dashboards.

Open CloudTrail and review audit event history.

Open AWS Health Dashboard and record the use case.

Open Billing and Cost Management.

Review the billing dashboard.

Open Cost Explorer if enabled.

Review cost filtering and forecast concepts.

(c) 2026 Tertiary Infotech Academy Pte Ltd

STEP-BY-STEP

Lab 7 Procedure (continued)

Open AWS Budgets.

Create a low threshold budget alert only if permitted by your trainer.

Open AWS Pricing Calculator.

Create a simple estimate for EC2, S3, or another assigned service.

Save or screenshot the estimate summary.

Review Savings Plans and Reserved Instances at a high level.

Compare Basic, Developer, Business, Enterprise On-Ramp, and Enterprise support plans.

Record which plan includes technical account management or faster support options.

Save your notes.

(c) 2026 Tertiary Infotech Academy Pte Ltd

EVIDENCE

Lab 7 Deliverables

Monitoring service notes

Budget or billing dashboard notes

Pricing Calculator estimate

Support plan comparison table

Validation: You should be able to explain which AWS tools help monitor resources, estimate costs, control spendi...

(c) 2026 Tertiary Infotech Academy Pte Ltd

LAB BRIEF

Lab 8: Architecture, Migration, Sustainability, and Exam Review

The final lab connects AWS services to architecture, migration, resilience, sustainability, and exam readiness.

Checkpoint: You should be ready to explain AWS Cloud Practitioner concepts and choose appropriate AWS services f...

(c) 2026 Tertiary Infotech Academy Pte Ltd

LAB

Lab 8 Objectives

Review AWS Well-Architected concepts.

Map migration and disaster recovery services to use cases.

Understand sustainability at a foundational level.

Complete certification-style review practice.

(c) 2026 Tertiary Infotech Academy Pte Ltd

STEP-BY-STEP

Lab 8 Procedure

Open AWS Well-Architected documentation or the Well-Architected Tool.

Record the six pillars.

Choose a simple workload such as a company website or internal app.

Map AWS services to compute, storage, database, network, security, monitoring, and cost areas.

Identify at least one reliability improvement.

Identify at least one security improvement.

Identify at least one cost optimization improvement.

Open AWS Migration Hub.

(c) 2026 Tertiary Infotech Academy Pte Ltd

STEP-BY-STEP

Lab 8 Procedure (continued)

Review Application Migration Service and Database Migration Service at a high level.

Record use cases for migration services.

Review disaster recovery strategies: backup and restore, pilot light, warm standby, and multi-site active-active.

Review sustainability practices such as right sizing, managed services, and efficient utilization.

Complete a timed 30-question practice set from trainer-provided questions or AWS practice resources.

Mark weak topics by domain: cloud concepts, security, services, billing, pricing, and support.

Create a final revision plan.

Save final notes.

(c) 2026 Tertiary Infotech Academy Pte Ltd

EVIDENCE

Lab 8 Deliverables

Well-Architected review notes

Simple workload service map

Migration and disaster recovery notes

Timed practice score

Weak-topic revision plan

Validation: You should be ready to explain AWS Cloud Practitioner concepts and choose appropriate AWS services f...

(c) 2026 Tertiary Infotech Academy Pte Ltd

PRACTICE EXAM

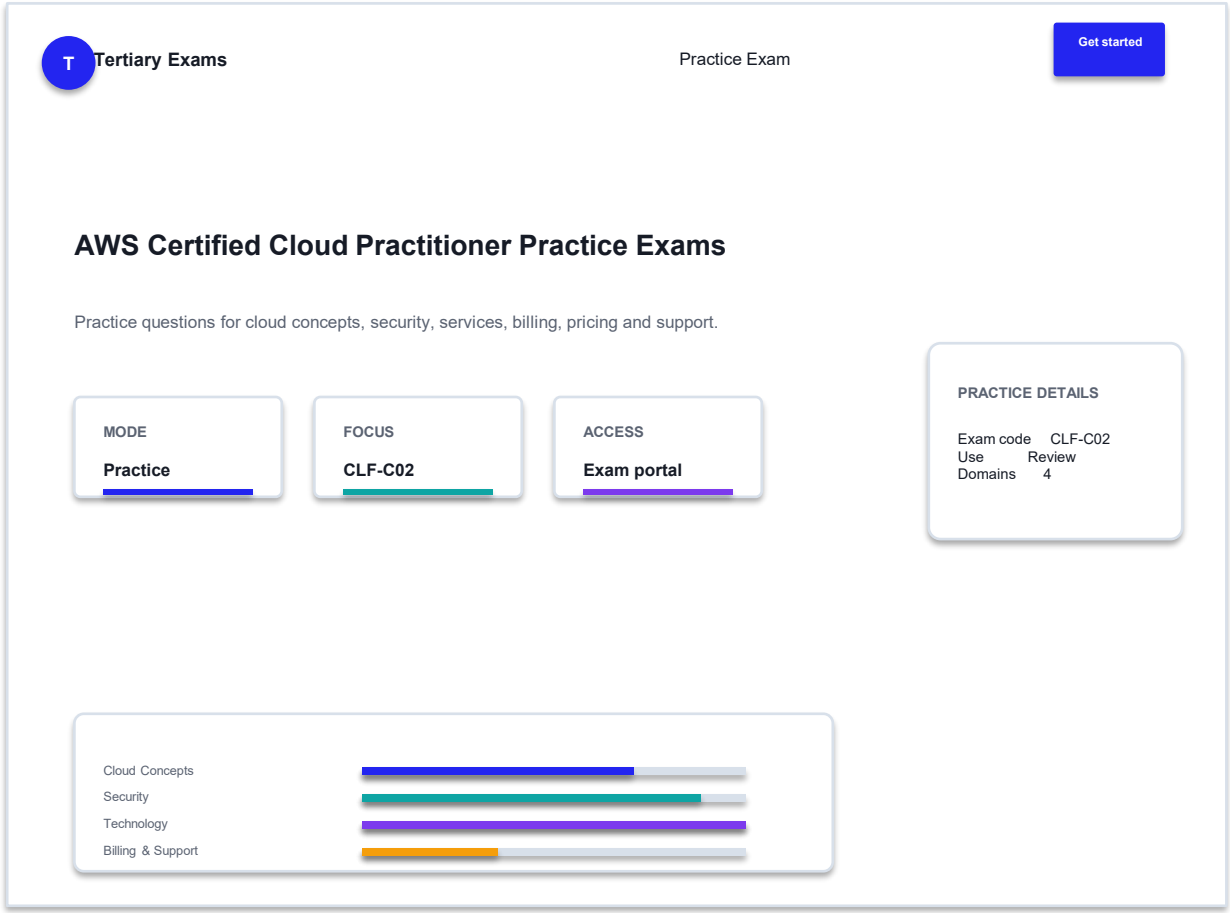

Take the Online AWS CCP Practice Exams

Reinforce AWS Cloud Practitioner domains with realistic exam-style questions.

Use practice sets to test cloud concepts, security, technology, billing and support.

Review mode helps you revisit the concept after each question.

Complete the practice questions from Tertiary Exams before the review session.

Access and practise at:

https://exams.tertiaryinfotech.com

(c) 2026 Tertiary Infotech Academy Pte Ltd

WRAP-UP

Final Submission Checklist

Lab notes or screenshots.

Shared responsibility table.

Compute, storage, database, networking and support comparison tables.

Budget or Pricing Calculator evidence.

Architecture review notes.

Timed practice score and weak-topic revision plan.

(c) 2026 Tertiary Infotech Academy Pte Ltd

Clean Up

Terminate EC2 instances created for practice.

Delete S3 buckets and objects created for labs.

Delete temporary Lambda functions if created.

Keep budget alerts active until cleanup is confirmed.

Save notes for final revision.

(c) 2026 Tertiary Infotech Academy Pte Ltd

ADMIN

Certification and TRAQOM Survey

Complete TRAQOM / course feedback.

Confirm assessment records are submitted.

Review weak topics by exam domain.

Plan revision using the final checklist.

(c) 2026 Tertiary Infotech Academy Pte Ltd
